

Human Dependence on Nature: How to Help Solve the Environmental Crisis

By Washington, Haydn

Routledge, 2012. Book Condition: New. Brand New, Unread Copy in Perfect Condition. A+ Customer Service! Summary: "Well researched and written in a style that is accessible to general readers, this volume is a solid addition to the human ecology literature. Summing Up: Highly recommended. All academic, general, and professional audiences." - K A. Reycraft, Florida Gulf Coast University, CHOICE "Our characteristics trace back to the forces that created the earliest simple organisms, and the physical features of our planet and other life forms have shaped the processes and traits that eventually produced modern human beings. But we biologists tend to be even more impressed by our utter dependence on the world that gave us evolutionary birth - on Nature, which nurtures us and to which we are tightly bound. When you've finished Human Dependence on Nature you'll be impressed too - and want to give a copy to everyone you know." - Professor Paul R. Ehrlich, President of the Center for Conservation Biology, Department of Biology, Stanford University, California "Endowed with unprecedented numbers, technological prowess, consumptive demand and a globalized economy, human beings are now undermining the very life support systems of Earth. The environmental movement has successfully raised concerns..."
