Not illustrated. 1893 Excerpt: .This is in accordance with the principle that with young pupils practice should precede theory. 5. The several things to be taught in fractions are as follows: 1. The idea of each fraction and the expression of it; 2. The fractional parts of numbers; 3. Solving problems requiring the fractional parts of numbers; 4. A few of the simpler cases of reduction. After the learner is familiar with these introductory exercises, he is prepared to take up the subject more thoroughly, and learn to dispose of all the ordinary cases. 6. The simple cases should be solved by analysis and induction. Special problems should be given for solution and the methods be inferred from the analysis of these problems. The principles of fractions should be illustrated rather than demonstrated. The pupils should commit the principles and learn to apply them readily. LESSON I. One-Half. IF I...
