

The Dominant Role of the User in Semiconductor and Electronic Subassembly Process Innovation (Classic Reprint)

Filesize: 5.26 MB

Reviews

*This book is great. I have go through and so i am confident that i will going to read through once again again in the future. I am just easily can get a satisfaction of looking at a written book.
(Miss Vernie Schimmel)*

THE DOMINANT ROLE OF THE USER IN SEMICONDUCTOR AND ELECTRONIC SUBASSEMBLY PROCESS INNOVATION (CLASSIC REPRINT)

To get **The Dominant Role of the User in Semiconductor and Electronic Subassembly Process Innovation (Classic Reprint)** PDF, remember to refer to the button below and save the document or get access to other information which might be in conjunction with THE DOMINANT ROLE OF THE USER IN SEMICONDUCTOR AND ELECTRONIC SUBASSEMBLY PROCESS INNOVATION (CLASSIC REPRINT) book.

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from The Dominant Role of the User in Semiconductor and Electronic Subassembly Process Innovation In an earlier study of scientific instrument innovations, we found that instrument users rather than instrument manufacturers dominated the innovation work in approximately 80 of the innovation cases studied. In the present paper, we extend this work by examining 55 process innovations used in the manufacture of semiconductors and electronic subassemblies. In 67 of the process innovations studied in this field which involved novel process machinery, we find that it is the process machinery user rather than the manufacturer who dominates the innovation process by: recognizing the need; inventing a solution; building a prototype; and using the prototype in commercial production prior to any involvement of a manufacturer of process machinery in the innovation work. The presence of a mix of user-dominated and manufacturer dominated innovation cases in our sample manufacturer dominated innovation embraces those innovation cases in which the maximum user contribution was recognition of need) allowed us to test various parameters which we hoped would discriminate between these two innovation patterns. Our success at this effort was unfortunately low- the only strong pattern found was that users always dominated the innovation process leading to first commercial practice of a given manufacturing process step, while both patterns are found in the case of improvement innovations. In a final section, the data and findings of three studies of process innovation in industries other than those studied by us are examined for indications of the innovative role played by the process user. The role of the user in each appears large, thus implying that the findings of our study may apply to process...
